Humphrey Lionel Gevero

Software Engineer | Project Manager | Client Support Analyst
Cagayan De Oro City, Northern Mindanao, Philippines

Summary

Results-driven IT professional with 3 years of experience in software development, project management, and client support. Experienced in managing client relationships, resolving technical issues, coordinating cross-functional teams, and delivering software solutions for enterprise clients. Strong background in SQL, web development, operations, and customer communication with a passion for improving processes and delivering exceptional service.

Experience

DICE205 Digital Corporation

CSA

May 2024 - Present (2 years 3 months)

Mandaluyong

Duties and Responsibilities:

- Debug and resolve production issues raised by store branches, conducting root cause analysis and maintain system uptime.
- Lead end-to-end Knowledge Transfer (KT) engineering sessions for newly onboarded associates, covering system architecture and workflows.
- Mentor team members on database operations, including writing optimized SQL queries for data extraction, schema auditing, and backend debugging.
- Conduct technical system demonstrations and architecture walkthroughs for clients and stakeholders to facilitate smooth platform integration.
- Manage client expectations regarding feature requests, release notes, and timelines while maintaining clear communication.
- Translate complex technical problems into actionable solutions, providing clear documentation on system updates and escalation paths.
- Maintain core application setups, handling backend configuration changes, asset deployment, and content updates across environments.
- Monitor live systems to perform preventive maintenance, track performance metrics, and build working knowledge to minimize downtime.

- Evaluate end-user requirements to determine if requests constitute a modification or fall within maintenance service contracts.
- Coordinate dedicated system deployments for retail rollouts, collaborating with brands, OM's and stores to manage setup timelines.
- Deliver initial post-launch support, tracking deployment stability, infrastructure reliability, and cross-functional engineering alignment.
- Provide regular updates to senior management regarding system deployment milestones, performance metrics, and release statuses.
- Collaborate with cross-functional engineering teams, clients, and partners to ensure long-term stability and scalability of application ecosystems.

Mabizza IT Solutions

Project Manager

April 2023 - March 2024 (1 year)

Cagayan De Oro City, Northern Mindanao, Philippines

Duties and Responsibilities:

- Manage the planning, execution, and delivery of software development projects aimed at creating applications for both administrative and client use.
- Serve as the primary point of contact for stakeholders, to gather requirements, provide project updates, and address any concerns or issues that may arise during the project lifecycle.
- Develop project plans, including defining scope, objectives, deliverables, and milestones, and create schedules to effectively manage project timelines.
- Implement quality assurance processes to ensure that software applications meet high standards of functionality, usability, and performance.
- Continuously assess project processes and performance metrics to identify areas for improvement and implement enhancements to optimize project efficiency and effectiveness.
- Maintain accurate project documentation, including project plans, status reports, and meeting minutes, and provide regular updates to stakeholders to ensure transparency and alignment throughout the project lifecycle.

Education

Capitol University

Bachelor of Science - BS, Information Technology · (June 2019 - July 2023)
